HB438 presentation – Ian Nesbit, ND

There are separate paradigms (groupthink) for both allopathic medicine and alternative/natural medicine for good reasons.

Putting natural medicine into the allopathic paradigm would NOT work, any more than putting allopathic medicine into the natural medicine paradigm.

Mixing ideas from different paradigms to make intelligent decisions about another paradigm is impossible.

This bill will prevent everybody outside of the allopathic paradigm from ever advancing within his or her medical career field.

It would limit Montanans right to choose the doctor of their choice, and threaten the alternative doctor's ability to treat patients as primary care doctors.

This bill is completely self-serving—allowing the crafters, allopathic physicians, to be exempt from the bill- giving them all control and a monopoly on medical care in Montana.

This bill is a very bad idea and unhealthy for Montanans.

VOTE NO ON HB 438.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971).
